

## StoryMap Comments Summary

A summary of the [StoryMap comments](#) is shown in Table 1.

**Table 1. StoryMap comments summary.**

#	Comment	Likes
1	Add sidewalk to Bruce Avenue between 4 <sup>th</sup> and ultimately 7th	1
2	Is it possible to improve ped facilities on the Tumalo Bridge to get across the Deschutes River? Add a ped walkway to the outside of the existing structure on either both sides or one side?	2
3	As traffic increases on Cook, should Wharton receive more bike/ped amenities as a parallel alternate route to Cook?  <i>Reply: There absolutely needs to be additional alternatives to get through town. Traffic on Cook has increased tremendously and bikes aren't safe on the road. (3 likes)</i>	1
4	Where practical, widen shoulders on Tumalo Road between Putnam/Tumalo Road and Cline Falls Hwy/Tumalo Road intersections  <i>Reply: Immediately after the bridge on Tumalo road there are about 3 main neighborhoods where people use Tumalo road to walk towards town. There isn't a great shoulder for pedestrians or bikes so the walk is pretty dangerous. Would be great to have wider shoulders and more accessible walking conditions (i.e. flatter). (1 like)</i>	1
5	Any safety improvements to this busy intersection would be great. RAB is the best option in my opinion.  <i>Reply: need electronic speed control..by the time they reach this intersection they are speeding up Cline falls road or Tumalo road, I believe this road is not designed for this much traffic...We need a bi-pass away from downtown Tumalo</i>	3  3
6	If Bruce Rd is to house a future transit stop, it will be critical to ensure that the stop is connected to the sidewalk network. It may be a good idea to include sidewalk improvements to Bruce in your plan.	1
7	This stretch of Cline Falls is very close to the river and it would be good to see active measures taken to prevent road pollution from entering the waterway. Aside from exhaust, oil, grease, and trash, tire fragments have been shown to make their way to the water in high concentrations.  Ideally the road could be moved away from the river.  <i>Reply: The noise pollution on this road as people speed up the hill is also out of control. Would be ideal to have stronger speed enforcement around this corner. It's also very dangerous for the wildlife crossing here - which happens very often - because people are just flooring it as soon as they get out of town.</i>	2   2
8	The speed limit jumps from 25 to 40 here when heading east. Cars are approaching the bridge from the west at 40 mph. There are often pedestrians on the bridge, or on the northwest side of the river with little protection. There is a house east of the sign that is only 30 feet from the road and on the curve. There are several other houses that are not setback too far from the road further to the east. I think it would be good to move the 40mph speed limit further east.  <i>Reply: I agree with this.</i>	2   1

13	<p>Great idea to have a bus stop in Tumalo for Route 29. Please consider a small covered and safe bus stop station either at 4th St near the pedestrian underpass and/or at the Cline Falls/Hwy20 round about.</p> <p><i>Reply: The risks associated with homeless people getting access to our town far outweigh the benefits for the couple of people in Tumalo who would make use of public transport. It is essential that the consultant run a cost versus benefit analysis on any such investments.</i></p>	1  1
14	<p>Large commercial building (Heritage Brand) is nearing completion on corner of 7th and Wharton. It appears there will be several driveway entries for this business. As a result, traffic will increase on 7th Street, on Wharton Ave., and on Cook Avenue. Please consider sidewalk needs on 7th and on Wharton.</p>	1
15	<p>I see only one proposed pedestrian path (providing sidewalks) that will cross Cook Ave. And that is the one marked at 8th Street. 8th Street is only a few car lengths off of Hwy. 20; and with the Hwy 20 round-about, I question crossing safety. Especially for children who walk or ride bikes to school. Cook Ave. (at any intersection) can be difficult to cross for pedestrians and bikers.</p>	1
17	<p>Please complete continuous sidewalk son Cook Ave. from Tumalo Road to the OB Riley Rd/HWY 20 round about.</p>	0
18	<p>Please add bike lanes to Tumalo Road between Cline Falls and the community boundary.</p>	0
19	<p>Public trail access along the Deschutes, connecting to the street ends (Pine, Fir, etc.) would enhance the rural village feel of Tumalo. Please add trail access to the west side of the river within the community boundary.</p>	0
21	<p>County nor consultant seem to understand that most of the 'bicycling' actually consists of amateur cyclists using the farm roads outside of Tumalo unincorporated. It's not people on eBikes getting their lunch at a food cart. The real issue to be addressed is coexistence between cyclist and farm equipment on rural roads</p>	0
22	<p>Highly congested with parked vehicles from river rafters. Congestion causes blind spots (ie: difficult crossing and pull-out) for vehicles, bicycles, and cars.</p>	0
